Bio: Xiangde is a postdoctoral researcher in **Prof. Ruijiang Li's** lab at **Stanford Medicine**. His research lies at the intersection of **computational pathology**, **multimodal foundation models**, and **AI for Science**. He is currently focused on developing multimodal pathology foundation models that integrate histology with spatial transcriptomics and proteomics to characterize how the spatial architecture of the TME shapes disease progression, therapeutic resistance, and clinical outcomes. His long-term goal is to translate these insights into scalable imaging biomarkers for precision oncology. Previously, he developed deep learning methods for annotation-efficient learning and biomedical image analysis. He has also led several community efforts in MICCAI, including the semi-supervised medical image segmentation benchmark **SSL4MIS** (2,600+ GitHub stars), the **SegRap2023** challenge, and two abdominal organ segmentation datasets **WORD** and **RAOS**. His work has received over **17,000 citations**, including **eight papers with ≥ 100 citations**, with an ***h*-index of 31** and an ***i10*-index of 44**. He serves as an **Area Chair** for MICCAI/AAAI and was named to the **Stanford/Elsevier World's Top 2% Scientists 2025**. *If you are interested in his work, have any questions, or would like to explore potential collaboration or work opportunities, please feel free to contact him.*

Education

- 2018-09 – 2024-06  **Ph.D., University of Electronic Science and Technology of China (UESTC)**
Supervisor: **Prof. Shaoting Zhang**
Thesis: *Medical Image Segmentation Using a Limited Amount of Labeled Data*
- 2014-09 – 2018-06  **B.E., University of Electronic Science and Technology of China (UESTC)**
Supervisor: **Prof. Shaoting Zhang**
Thesis: *Data capture using crawl and its applications*

Employment History

- 2024-11 – present  **Postdoctoral Fellow at Stanford University, Advisor: Prof. Ruijiang Li**
- 2024-07 – 2024-10  **Research Assistant at West China Hospital, Mentor: Prof. Kang Li**
- 2021-06 – 2024-06  **Research Intern at Shanghai AI Laboratory, Mentor: Prof. Xiaofan Zhang**
- 2019-07 – 2020-06  **Research Intern at SenseTime Research, Mentor: Dr. Tao Song**
